Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Nakagawa et al.

Nakagawa et al. shows a body structure (figure 5) of a stand-up type watercraft, comprising a body having an inner space defined by a hull and a deck, an engine [11] mounted within the inner space of the body, a water jet pump placed behind the engine and configured to be driven by the engine; and a bulkhead placed behind the engine. The bulkhead is configured to separate the inner space of the body into an engine room [10] on a front side within which the engine is contained, and a closed rear space [13] on a rear side. A first drain hole [23a] is provided in the closed rear space of the body so as to communicate with an outside of the watercraft.

In one embodiment (figure 4), a second drain hole [28a] is provided in the bulkhead to allow the engine room and the rear space to communicate with each other so as to communicate with

Allowable Subject Matter

3. Claims 2 and 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not yet relied upon is considered pertinent to applicant's disclosure:

Ibata et al., Hattori, Yoshida, JP (296) and JP (481) show bulkhead structures with drain holes.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ajay Vasudeva whose telephone number is (703) 306-5992. The examiner can normally be reached on Monday-Friday 1:00 pm--5:30 pm.
